

Syringa ‘Aurea’

Selling

April onwards

Features

Golden yellow foliage, young leaves are tipped burgundy. Rose pink flowers in Spring.

Benefits

Commonly known as the Golden Lilac, it excels in all reasonable soils, and can be grown as a small tree or large shrub. It has very sweetly scented flowers.

Story

Introduced by Webbs in 2006 following trials in their research and development unit. A form of the common Lilac, which was introduced to the UK, from the mountains of South Eastern Europe in the 16th century.
