

# Lavandula ‘Vera’

## **Selling**

March to May

## **Features**

Silver foliage all year round, with dense spikes of fragrant blue flowers in Summer.

## **Benefits**

A very compact, strong form of lavender. It's fragrance attracts wildlife and it can be easily dried. Excellent in maritime borders.

## **Story**

Thought to be a very close relative of the original species of Lavandula, which was known as Lavandula officinalis, meaning ‘used in medicine’.
