

Environmental Policy

Bransford Webbs is an ornamental plant nursery, which is based on one site in Worcester

As suppliers of new and sought after plants to the Garden Centre market, our product can have a very positive impact on the environment of others. At Bransford Webbs we also recognize and accept the need to provide a safe and environmentally responsible managed business.

To this end we will implement an environmental management system and strive toward adopting best environmental practice.

Specifically we will

- Comply with environmental legislation and other relevant requirements.
- Investigate our impact on the environment and set priorities to reduce it.
- Control and minimize our waste, making full use of available recycling schemes.
- Monitor our energy and fuel consumption and improve efficiencies.
- Operate a tiered approach to integrated pest management using the effective treatment with the least environmental impact.
- Employ water saving technology where practicable
- Consider the environmental impact of our purchasing decisions.
- Raise awareness of the environment amongst our employees through briefings and appropriate training to promote best practice.
- Ensure continual improvement by including environmental objectives as part of our business strategy.
- Ensure the prevention of pollution.
- Reduce where possible our reliance on peat
- Work with suppliers and customers to identify environmental improvement.
